

Post-Launch Checklist

- ☐ Ensure that at least two people are using this checklist after launch
- ☐ Double check that there are no hazards which have gone unnoticed during the launch before approaching the launch pad or the rocket for clean-up.
 - ☐ If there are hazards, notify emergency personnel
- ☐ Let NASA officials verify the results of the launch, if necessary
- ☐ Double check that all necessary data from the avionics bay has been retrieved
 - ☐ If so, disarm the avionics
- ☐ Disarm the launch controller
- ☐ Place cap on launch rods, if necessary
- ☐ Take down the launch pad, if necessary
- ☐ Retrieve the main rocket body and all components which may have landed separately
 - ☐ Check them for any failed ejection charges
 - ☐ If there are failed ejection charges, safe all ejection circuits and remove any non-discharged pyrotechnics
